EDUCATION

Emory University Atlanta, GA
B.S. in Computer Science (AI Concentration), Minor in Applied Mathematics | **GPA**: 4.0/4.0 Expected May 2028
Honors: NCAA DIII Player of the Year, 2× NCAA National Team Champion
Coursework: Data Structures & Algorithms (Java), Systems Programming (C/Linux), Database Systems (SQL), Computer Architecture (C/MIPS), Artificial Intelligence, Machine Learning (Python)

EXPERIENCE

Tuilink | Software Engineering Intern 09/2026 - Present
Python, TypeScript, LangGraph, Pydantic, OpenAI API, AWS Lambda, API Gateway, AWS CDK Remote

- Developing two LangGraph multi-agent services: AI Auto Reply and JD–Resume Matcher, owning design, delivery, and deployment
- Designing structured communication between AI agents using Pydantic models and stateless JSON workflows, while implementing caching to reduce debugging time and OpenAI token costs
- Building serverless AWS infrastructure using AWS CDK, enabling one-command provisioning and deployments

Emory University | Software Engineering Research Intern 06/2026 - 09/2026
Python, Java, Docker, Git, Linux, AWS Remote

- Integrated 5 open-source clone detectors into a unified benchmark to evaluate performance on LLM-rewritten repositories
- Developed adapters to standardize detector outputs for cross-detector evaluation
- Implemented token-based clone detection scoring using detected-to-total token ratios

Emory University | Web Development Intern | Live Site 12/2025 - 02/2026
React, TypeScript, Bootstrap, Python Atlanta, GA (Hybrid)

- Built a frontend platform for researchers to explore 21 continuous glucose monitoring datasets with previews and filters, achieving 89% positive ratings for ease of dataset discovery in an 18-person user study
- Computed glucose distributions across 5 clinical ranges for visualization, helping 78% of researchers assess dataset suitability

Emory University | Software Engineering Research Intern (NSF REU) 05/2025 - 08/2025
Python, REST APIs, Gemini API, LanceDB Remote

- Implemented paper ingestion pipelines for a ~250M-paper AI-powered literature review platform
- Integrated OpenAlex, Crossref, and Semantic Scholar APIs to extract citation metadata for citation graph construction
- Optimized Semantic Scholar API retrieval with batch requests, reducing HTTP requests by 98.7% (451 → 6) and observed runtime by 99.9% (40.1 min → 3.21s) while improving paper processing success rate from 60% to 100% in a 5-paper live run
- Automated Gemini prompt construction, structured output generation, and DOI mapping to build ground truth for benchmarking RAG retrieval methods

PROJECTS

Emory Women's Golf Web | Project Lead & Full-Stack Developer 11/2025 - 09/2026
React, TypeScript, Bootstrap, Python, REST APIs, FastAPI, Firebase, MongoDB

- Built and deployed the first full-stack platform for Emory Women's Golf's season-long points game
- Automated point and standing updates from coach-entered activities, replacing a manual whiteboard workflow
- Implemented Firebase authentication and RBAC with coach-only write access
- Used daily by 10+ athletes and coaches, saving an estimated 100+ hours annually

Customer Churn Prediction & Retention Analytics | Project Lead & ML Engineer 01/2026 - 04/2026
Python, scikit-learn, Pandas, NumPy, Matplotlib

- Led a 3-person team to analyze and predict telecom churn and develop targeted retention strategies
- Trained 5 churn prediction models, achieving 0.87 AUROC with SVM; tuned thresholds across all models, improving Random Forest test F1 by 11.6%

DooleyHelpz | Database Lead & Backend Developer 08/2025 - 12/2025
MongoDB, Python

- Developed an academic course planning platform for 300+ Emory CS students
- Reduced planning from hours to minutes by generating schedules based on degree requirements and personal preferences
- Architected a MongoDB database for 4,000+ course records, modeling prerequisites, co-requisites, and anti-requisites
- Designed a graduation requirement checker with rule-based evaluation

ACTIVITIES

Emory Women's Golf Team 08/2024 - Present

- Balanced 20+ hours/week of training and national competition with a full academic course load
- Earned 2025–26 DIII Player of the Year, 2× NCAA DIII National Team Champion, 2× First Team All-American

SKILLS

Languages: Python, Java, TypeScript, JavaScript, C, SQL, HTML/CSS, MIPS Assembly
Frameworks & Libraries: React, FastAPI, LangGraph, Pydantic, scikit-learn, NumPy, Pandas, Hugging Face, Bootstrap
Tools, Databases & Cloud: Git, AWS (Lambda, API Gateway, CDK), Docker, Linux, MongoDB, PostgreSQL, Firebase, OpenAI API, Gemini API
